

DMS NPC

Company Profile

Who We Are

DMS NPC, founded in 1999, is a Non-Profit Company operating in the disaster risk management field. We focus on delivering tailor-made community-based solutions to effectively manage disaster risk and enhance community resilience.

Our Motivation

One of the most pressing challenges is the extraordinary increase in the number and extent of disasters. The cost of disasters disproportionately impacts the poorest and most vulnerable communities. Without disaster risk reduction intervention, climate change, rapid population growth and environmental degradation will continue to exacerbate the impacts of disasters. The goal of disaster risk reduction is to prevent new risks, reduce existing risks and increase resilience in a developmental and sustainable way.

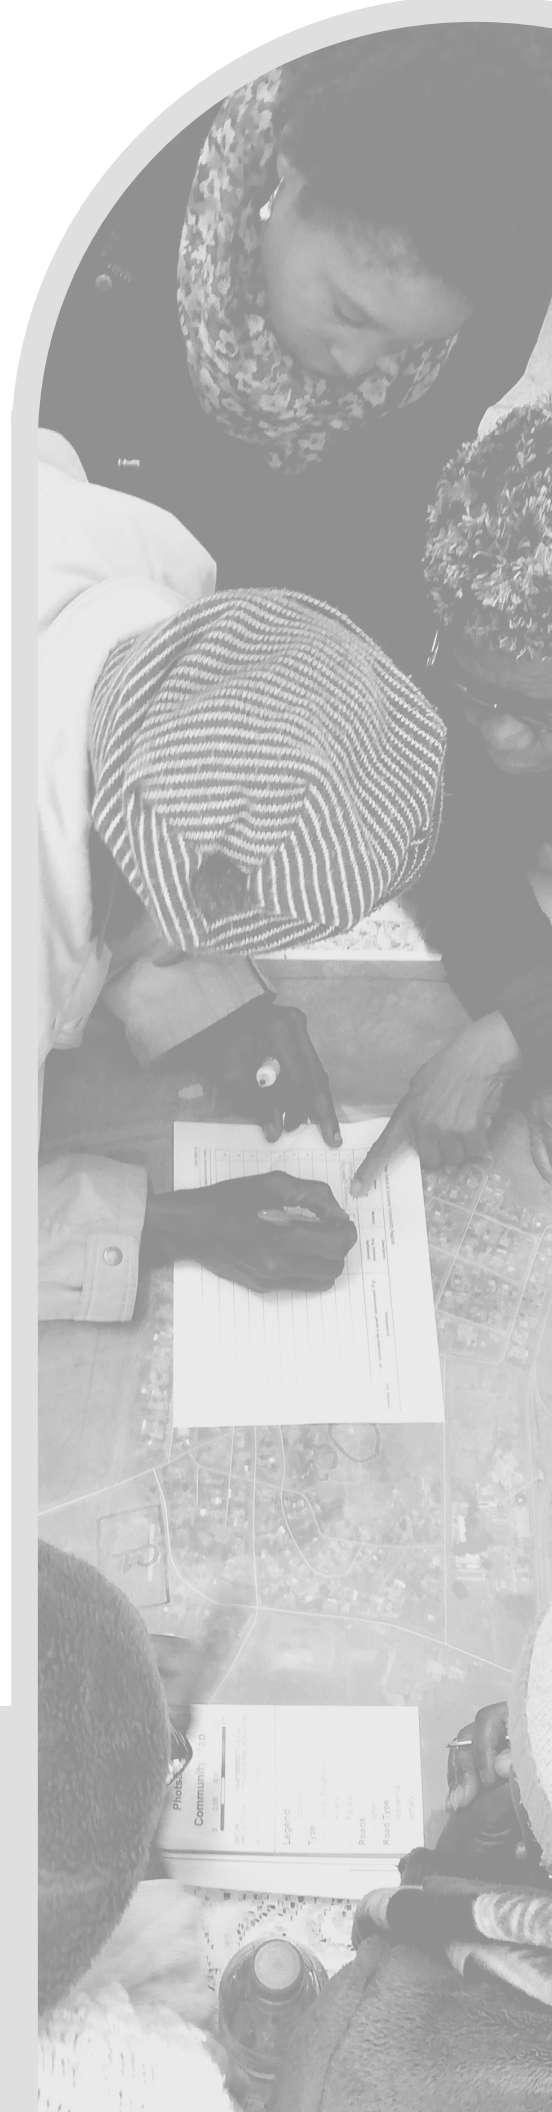

We aim to break the reactive cycle and encourage a more proactive and developmental approach to disaster risk management, emphasising pre-disaster interventions and solutions. Through community engagement and collaboration we aim to empower vulnerable communities to be active agents in reducing their own risk and encourage sustainable development within their community.

Vision

Resilient communities that are self-reliant and adaptable through sustainable livelihoods.

Mission

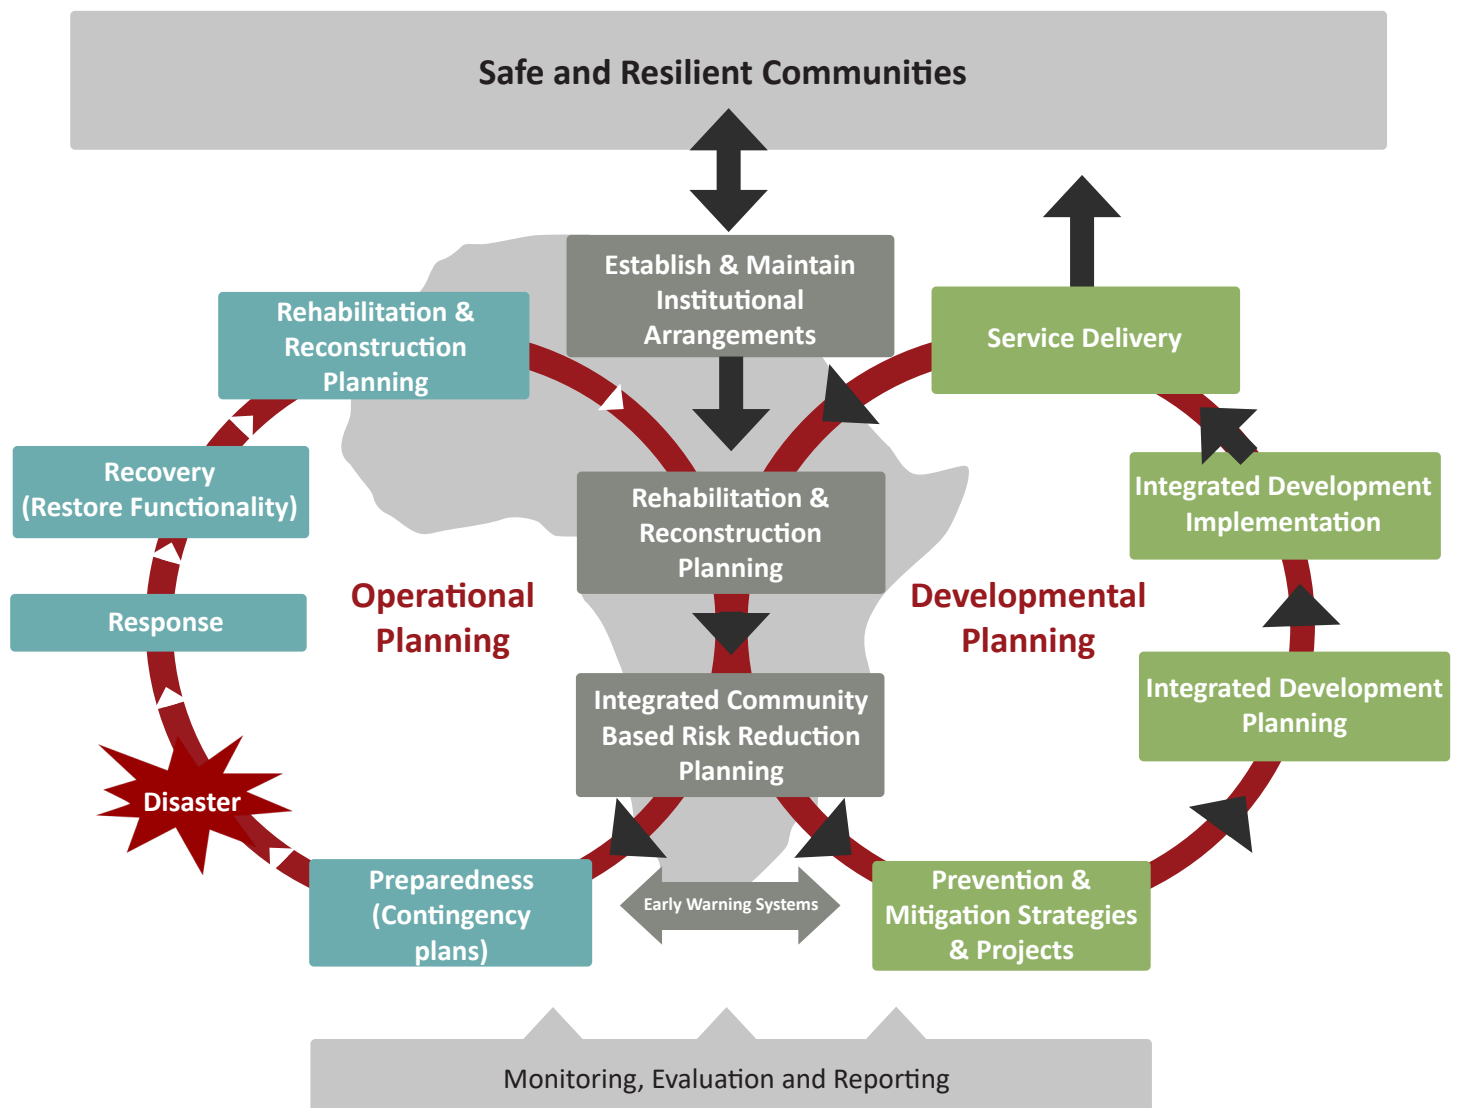

Enhancing Community Resilience

Approach to Disaster Risk Management

DMS NPC's approach to disaster risk management focuses on both the developmental and operational planning elements of disaster risk management, illustrated as the two planning cycles in the figure below. Where possible, disaster risk management efforts geared towards the proactive developmental planning cycle will be prioritised, considering that its successful implementation will negate or at least minimise the need for recurring response and recovery efforts.

DMS NPC can translate and tailor each of the elements present in the illustration below into a disaster risk management-related solution according to the needs of a community, organisation, organ of state, municipality or province.

Solutions

DMS NPC provides tailored community-based solutions derived from each of the components illustrated in the developmental and operational disaster risk management planning cycles. These include, but are not limited to –

- Establishing and maintaining institutional arrangements for disaster risk management
- Early warning systems
- Disaster risk assessments
- Disaster management plans
- Disaster risk reduction and contingency plans
- Disaster risk management policy development
- Disaster response and recovery
- Accredited disaster risk management related training

SUSTAINABLE DEVELOPMENT GOALS

DMS NPC supports the Sustainable Development Goals

As an accredited training service provider, DMS NPC prioritises holistic capacity development to support the successful and sustainable implementation of each of its solutions, addressing capacity requirements for the enabling environment, organisation and individuals involved.

Donations

DMS NPC has been approved as a Public Benefit Organisation (PBO) in terms section 18A(1)(a) of the Income Tax Act (Act 58 of 1962), where donations to the organisation will be tax deductible in the hands of the donors in terms of and subject to the limitations prescribed in section 18A of the Act.
